Crisis Care Navigation

Immediate support, clinical guidance, and a path forward.

What is Crisis Care Navigation?

Crisis Care Navigation is a short term, community based program for families and youth experiencing challenging levels of care including exiting from hospitals, residential, crisis units, and any other change where support in maintaining stability and safety is needed.

No youth or family should face a crisis without support during difficult times, our program brings help directly to you. We keep our services open-ended for those unsure of what care they need, stepping in to assess safety, restore stability, and manage challenges like trauma, mental health issues, escalating behaviors, suicidal thoughts, or caregiver conflict. By stabilizing families in their own environments, we provide a vital community-based alternative for youth entering or exiting higher levels of care like residential placement, crisis beds, or hospital stays. Every service we provide focuses on the ultimate goal of ensuring a warm, seamless connection to appropriate longer-term support.
